**Subject:** Great science over there at NOAA

Hi NMFS friends

Is something like this likely to happen to you if you don't sign the newly rewritten CA Bay Delta salmon biop? Feeling bad for all of you these days, when your colleagues are being punished for being honest about science. Although we're very concerned about an eventual no-jeopardy biop after you found clearly found jeopardy, as documented by the LA Times, we appreciate the work you did along the way.
