Subject: [URGENT-UPDATE] Message From NWS Leadership On Recent WH Tweet; Send Any Questions to NOAA Public Affairs

NWS Team,

There are new communications on this issue coming out shortly. I have pasted the draft text of a media guidance pending from NOAA below.

Please remind all of your staff down to the line level to refrain from any communications on the issue and to refer any media inquiries to NOAA Communications.

Thank you

George

September 6, 2019

From Wednesday, August 28, through Monday, September 2, the information provided by NOAA and the National Hurricane Center to President Trump and the wider public demonstrated that tropical-storm-force winds from Hurricane Dorian could impact Alabama. This is clearly demonstrated in Hurricane Advisories #15 through #41, which can be viewed at the following [link](#).

The Birmingham National Weather Service's Sunday morning tweet spoke in absolute terms that were inconsistent with probabilities from the best forecast products available at the time.

Colleagues, a reminder that this guidance still applies given there have been subsequent tweets since this original message.

Thank you

George

Attention all ROCs and National Centers,

NWS Leadership is asking that we do NOT respond via social media, or other, to any questions which arise from a tweet recently posted by the White House containing an old NHC forecast for Dorian.

Staff should direct any questions/inquiries to NOAA Public Affairs. Have them contact Christopher Vaccaro (christopher.vaccaro@noaa.gov) and also copy Susan Buchanan (susan.buchanan@noaa.gov) and Lauren Gaches (lauren.gaches@noaa.gov).

ROCs, please pass along this message to WFOs, National Centers, please pass along to staff working social media/phones.

Thank you,

Shawn Smith
