Subject: Re: TIME SENSITIVE inquiry from WaPo

The WaPo piece is prompting more inquiries (MSNBC and The Hill). Chris and I are working with Julie. Some print editions of the Post didn't include our statement, but it's in the online version. This is breaking... more to come.

Louis,

Here is the timeline. I received the message from Susan about the Washington Examiner article. That was the first indication that there was a POTUS post.

After that, I sent the second message for the ROC to send out a message. I coordinated this with Mary via text. The resulting message to the field is the 3rd message below.

On Sun, Sep 1, 2019 at 4:15 PM Andrew Stern - NOAA Federal <andrew.stern@noaa.gov> wrote:
FYI - see article from Washington Examiner from this afternoon. Puts POTUS impact claims against the official forecast and now one WFO is refuting POTUS comments. Just want you to be aware. Need to keep our folks safe and out of the fray.

Ops Center,

Please send out a message to all ROCs to alert all WFOs to only stick with official NHC forecasts if questions arise from some national level social media posts this afternoon. Staff should not provide any opinion about the national level posts and should direct any questions that cannot be satisfied to NOAA Public Affairs. Either have them contact Susan Buchanan (susan.buchanan@noaa.gov) or Lauren Gaches (lauren.gaches@noaa.gov).

Thank you,
Andy

Attention all ROCs and National Centers,

NWS Leadership is asking that we only stick with official NHC forecasts if questions arise from some national level social media posts which hit the news this afternoon. Staff should not provide any opinion about the national level posts and should direct any questions that cannot be satisfied to NOAA Public Affairs. Either have them contact Susan Buchanan (susan.buchanan@noaa.gov) or Lauren Gaches (lauren.gaches@noaa.gov).

ROCs please pass along this message to WFOs, National Centers please pass along to staff working social media.

Thanks,

Shawn Smith

Andy: I was going to offer a modification to your suggested reply below but paused when I read in a later email that these were your exact words. What was going to insert was the word "ongoing" or

developing” between “other” and “severe”. To read “....other ongoing severe ...” or “...other developing severe....”.

If you want to stick with original, I understand but I thought your point about the other events was important and I was trying to insert a bit more urgency

Louis

Susan,

I concur with your assessment. However, it was bigger than just Dorian. We had wildfires ongoing in the west, developing tropical systems in both the Atlantic and Pacific basins and had other areas of thunderstorms to watch. I would modify it slightly. Our mission is supposed to be apolitical.

"NWS leadership sent these directives to field staff so they (and the entire agency) could maintain operational focus on Dorian and other severe weather hazards without distraction."

We may not get clearance to respond, but if Julie approves, I suggest something simple like this:

"NWS leadership sent these directives to field staff so they (and the entire agency) could maintain operational focus on Dorian without distraction."

Subject: TIME SENSITIVE inquiry from WaPo

Hi NWS press folks and Director Uccellini,

This is for a Washington Post story **running imminently online and in print on Sunday.**

On Sept. 1 and again on Sept. 4, NWS personnel received a guidance not to provide opinions on national level social media posts in the media and to stick with NHC forecasts if questions arise about the posts.

Staff understood this to be a response to President Trump's Alabama comments and that they were essentially being told not to contradict the president.

Can you respond to this and explain the reason behind sending these dual directives?

Please send any responses to Colby and myself. I'm cc'ing Jason as well who has been working on this story.

Thank you and all the best,
-Andrew
