Subject: Re: Wash Examiner: Trump says Hurricane Dorian will hit Alabama as forecasters insist there is no threat

I understand completely but I am trying to figure out how he got this in the first place. And make sure that even as we centralize our response we be careful, as we always are. Take a look at the HWRF.

Thx- I have not seen model runs; I am sure NHC is watching. Our point is that it is not WFO role to counter or respond to presidential tweets. Want them to leave the forecast to NHC.

I think we all realize there is a lot of uncertainty. Could be Neil showed him HWRF.

Mary: just waking up from a nap. Has anyone looked at the 12z HWRF? It has a landfalling hurricane in Florida that then moves to north central Florida into southern GA. The model run does not produce any precip in AL but it is not that far away. Maybe someone in WH showed him that? Look I am not buying the HWRF prediction as it continues to be an outlier but

(b)(5)

God only knows what would happen if AL gets a drop of rain out of this storm. Louis

I was not aware, will get the word out - I don't see that any of these directly respond, but we will be sure to clarify.

FYI - see article from Washington Examiner from this afternoon. Puts POTUS impact claims against the official forecast and now one WFO is refuting POTUS comments. Just want you to be aware. Need to keep our folks safe and out of the fray.
