I read your statement regarding hurricane Dorian's supposed treat to Alabama. It would seem that you have abandoned science in your Orwellian attempt to cover up for the idiocy of the president. It is troubling that you would damage the credibility of a government agency that millions of Americans depend on in times of weather emergencies in order to placate the damaged ego of trump, but I imagine that was part of the deal when you got the job. Your actions were sad and shameful. How can we believe anything from NOAA anymore?

I read your Orwellian statement in defense of trump's outlandish remarks on hurricane Dorian, and it's so-called threat to Alabama.
