Subject: Refuting the work of your meteorologists

Ms Roberts, shame on you or whoever authorized the RIDICULOUS (unsigned) NOAA statement that the President was correct in his observation that Alabama was in the path of Hurricane Dorian! Do you think the American people are idiots and cannot see that this untrue missive was a spectacularly sycophantic attempt to appease His Majesty, at the expense of your truthful, hard- working employees? The fact that even NOAA, which used to have such credibility, has succumbed to his narcissistic demands is nauseating. I will never trust your organization the same way again. I suggest you apologize to your employees, then to the American people.

Sincerely,
Linda H Sheldon
