Justin,

My understanding is that Reclamation is coordinating with DWR and the Federal and state water contractors in the development of the proposed action for ROC on LTO. However, that shouldn't preclude us from providing input that they may consider.

The attached Gantt chart was from light years ago, way back in June, but that's the most recent version that I have with the end date of August 2020.

-Garwin-

Hi Garwin,

My understanding is that Reclamation is not currently seeking input from agencies and stakeholders on the ROC on LTO. However, if there are important operational considerations for the Trinity River Division, I assume we should be able to suggest Reclamation include into the proposed action. Please let me know if my understanding and assumption are correct.

Also, any chance you have that updated gantt chart?

Thanks,

Do you know if Reclamation is going to ask for any more input or comment on the proposed action? I know when we talked about this and you talked with Garwin you thought the answer may be no. I'm supposed to report back to the flow work group if its possible to get certain operations or actions into the proposed action for the ROC CVO.

Hi Justin -

Currently our direction is to complete BO(s) on the long-term ROC on LTO by August 2020. You can share that date.

Attached is a schedule for how to get there - you can share this if you like.

Thank you,

Katrina Harrison
