**Subject:** Re: Action Items - ROC LTO Agency Core Team 1/9

I made it to the meeting just in time to talk about scheduling for the next ROC on LTO core team meeting.

For the last action item, can the list of species be based on division or geographic area? For example, there is now evidence that juvenile winter-run rear in the lower American River, but I don't think I would know whether winter-run would be analyzed or not as part of the American River Division.

Hi everyone,

The following are the action items from today's ROC on LTO Agency Core team meeting.

- Katrina will develop a list of reference materials (from previous idea generation) and will send to the agencies
- The agencies should continue to have their solicitors/counselors review the two ROC briefing paper (duration and CWF)
- Katrina will email the current draft schedule for Track 3 of the ROC to the agencies.
- Katrina to email out revised Friant table
- Katrina will develop a list of the species previously consulted on, with rough suggestions on which Track they may factor into, and which would be considered in NEPA documents vs. ESA documents.

Thanks,  
Luke
