A few thoughts from me. Great potential for a relatively cheap and possibly permitting-free eDNA study..a few details provided in the attached.

All,

If you want to weigh in on the initial track 1 ideas attached, please do so, with the following caveats:

- Your optional review and feedback should be very conceptual and high elevation, so please do not:
 - ++ spend much time stewing over them and going down rabbit trails
 - ++ provide a bunch of analyses or rationale regarding them.
- Use track changes to provide comments, but keep them to a minimum
- These are Reclamation's brainstormed ideas, so intentionally don't have any level of detail, so please don't ask for more details
- I have a ROC on LTO core team meeting tomorrow at 2 p.m., when we will discuss the ideas. I don't have to have your feedback by then, but given the above (high elevation and not much time), if you send me initial thoughts by 1 p.m., that'd be helpful.

Thanks.

-Garwin-

Hello all -

I just rescheduled the 3/6 Core Team meeting for this Tuesday, 2/27, so that we would have an opportunity to meet before the other ROC meetings next week. Also 3/6 is IEP. Hopefully this works for folks.

Attached is a draft initial list of ideas for Track 1 from Ben for your consideration. We can discuss more on Tuesday.

Also attached is a draft schedule for Tracks 1 and 2, including various meetings that we are starting to schedule now to develop and refine ideas.

Thanks and I look forward to talking with you all soon!
