Subject: Re: [EXTERNAL] ROC on LTO: Delta Division team

An argument for KEEPING the velocity plots (either in text or as an appendix) is that those were (I think) the supplemental plots we asked for so we can't just refer to the BA.

Thanks for keeping tabs on this, Susan. Let's stick with the plan to have all of the tables and figures at the end of the Delta section. If folks (e.g., Maria, who mentioned it earlier) want them in line with the text, we can do that for the final BiOp (June 17).

Barb and Jeff are still working on inserting text (and possibly more tables/figures), so please hold off working on it. Good to know that it'll take you at least a day to organize and finalize. We'll shoot for pens down on Thursday at 12 p.m. so you can do your magic.

I haven't looked at the Delta section "in awhile," but don't remember any convincing argument to keep the 15-page figure, especially since it was mentioned "in passing" once in the text. Barb/Jeff—Thoughts? I did see what looked like an excerpted example of the figure in the high-level summary of effects PPT presentation that we provided last week.

Garwin et al -

I still want to confirm with all of you the final plan for insertion of Tables and Figures in this section before I do anything more.

Once the authors are out of the document and at a place where I can go in and number and link tables, I will need at least a day to organize and finalize.

Then, I need to know if they are ALL going at the end - which means I will pull out the newest ones that have been inserted, figure out where they go in the order, insert amidst the others, update captions, change text references, and then go back and cross reference everything.

ALSO, we need a final call on Figures 2.5.6-11 and 2.5.6-12 - are they ALL staying or are we picking an example?

I just want to make sure everyone is in agreement on whatever is decided.

Thank you.
Susan

Jeff and team,

We received comments back from Rosalie on the Delta Division effects section (and figures and tables files), which I placed in the ROCON drive.

-- Please coordinate with Barb regarding which version to use as the base/master

-- Please address all outstanding comments, and Rosalie's track changes, so in the end, we will have a clean document with only comment bubbles for references.

-- Barb may be adding some text, so make sure to coordinate with the team to reduce the potential for version control issues.

-- Note that I have been sending out task e-mails individually, and you may have overlapping tasks. If you need help with workload or priorities, Howard, Cathy, and/or I will be available to help.

Susan--The figures and tables will need to be relabeled given the new ones that have been inserted into the main section.

Thanks!
