

Issue	NMFS perspective	USFWS perspective	Reclamation perspective	Resolution
COA	COA drives operations, can limit flexibility		Non-starter to revisit. ESA obligations completed. Not sure of end goal or interest to unwind.	Elevate immediately
Shasta Dam raise operations	relying on feasibility report, tough to understand proposal, effects difficult to understand	Not really elevation topic, but interested to see how it will be resolved	wants to cover site specific through feasibility study, could be programmatic, but not including at all will cause consternation in Reclamation leadership	
Fish Passage Program	Key program that got us out of jeopardy, provides water supply flexibility. Part of		Non issue. Will not fund.	Elevate immediately
Allocations and shortage policy	Not a clear understanding of how allocations fit in to fish protections		Allocations are proposed after environmental considerations have been addressed	Focused meeting scheduled to try to work through this.
Consultation status of TRD (ROD flows and lower Klamath flow augmentation)	TRRP consultation is stale, warrants reinitiation	No issue	Concern about reopening ROD flows	
Adaptive management (AM) process	We worked with 5 agencies to develop an AM framework that should be applied			focused meeting scheduled to try to work through this, but if doesn't work out, then elevate

Director-level offramp of real-time OMR				focused Delta group meeting to try to work through
I:E ratio (NMFS placeholder)	Need to understand how the OMR action is similar (or not) to the I:E ratio			focused Delta group meeting to try to work through
fall X2 (USFWS placeholder)				action item for USFWS by the end of the week)
