Subject: Some preliminary plots for Martin Vs Anderson models

Hi Eric,

Attached are some preliminary plots looking at two years for the PA scenario comparing potential differences between the Martin and Anderson models.

One plot shows the years where the two models diverged the most, with the Martin model predicting greater mortality (Yr 1939). The other plot shows the years where the two models diverged the most, with the Anderson model predicting greater mortality (Yr 1991).

Let me know when you want to talk more about this.

-Miles
