Subject: Re: Shasta RPA workshop idea

Maria,

Based on our Wednesday meeting with Federico and Jeff R., and in consideration of folks' travel from all over "just for an update" (as opposed to the expected workshop), we decided on a conference call. We could still tag team Reclamation and NMFS talking about the science plan, but will have to rethink how to get stakeholder input on management questions (e-mail instead of index cards)?

Dave -

I was thinking more about what kind of status report we could give at the workshop next week on the joint science and monitoring. plan. It would be nice to have a joint presentation to show we are working together. What if you presented the concept, objective and outline of the plan, then I stood up and presented NMFS draft management questions. Then we could have index cards on chairs, and invite everyone to write in their management questions, and collate that input and then present at the final workshop, along with final management questions that will drive the plan?

I'm trying to use these meetings to get some structured input, as opposed to just presentations. So, I thought that would be easy. Thoughts?
