Subject: Re: Shasta science work plan

Don't know?

but it doesn't matter as he's out of the office today and maybe (all of?) next week?

If you don't have time I'll just incorporate the comments as they are and recirculate. I was just looking for your (next-level) perspective which you can provide later if you're busy.

As I mentioned, the pieces that I'd hoped Josh would provide are some example studies that could address the management questions. I don't *know* that it's necessary for this document but I thought that that would be easy for Josh because he's kind of an idea guy.

Let me know if you have time and I'll act accordingly.

Evan

I'm teleworking. Will add this to my list, but have a lot of irons to the fire. I don't know why it's been so difficult to coordinate with the BDO lately, on so many fronts (with Dave M. on WIIN Act, with Josh and Dave on the Science Plan, and with Mike H. on the LOBO review, just to name a few). Would it help if you get on the horn with Josh and talk through what you were thinking (for the document and what you were hoping Josh would input)?

Hey Garwin,

Not sure what you're up to today but could you give this version of the work plan a look? Josh made some comments to the version I sent him on Wednesday, he recommended accepting all changes and circulating to the wider audience but I hesitate. I still think the work plan is lacking and I had hoped that he would provide some more information on how we propose to address the management questions posed (I thought he would add to the "methods" sections under each management question category but he didn't).

I'd appreciate your take and if you're able I'll add any changes and send it around.

Thanks,
Evan
