Subject: Re: Check-in on status of SRKW "parts" in the Draft ROC BiOp

Attached is the long version of the SOS.

It does not look like ***Environmental Baseline v3 - srb - nh - noa.doc*** includes my most recent edits. Attached is what I sent a couple weeks ago, including response/resolution to the comments.

Dan

(Garwin & Susan -- you are just cc'ed FYI re: my activity in the Draft BiOp files)

Dan -- My notes from our call Thursday afternoon say we should have (1) long version of SRKW status of species, (2) short version of SRKW status of species, and (3) SRKW stuff for baseline.

LONG-VERSION SOS: I don't see a "long version" SRKW status in our current long-version SOS or in my e-mail. **Can you please re-send the long version of SRKW status** (or maybe you uploaded to google drive or ROCON somewhere)? If I misunderstood and there isn't a long-version yet, check back with me before drafting anything.

SHORT-VERSION SOS: The short version of your SRKW status (attached) wasn't yet included in the V4 document, but I added it to create a new version: 2-2-Status-of-Species-and-CH-V5--BBadd of SRKW from DL.doc

ENV BASELINE: There is a SRKW section in the latest Environmental Baseline section (***Environmental Baseline v3 - srb - nh - noa.doc***). There are a few comments from you sprinkled in it...which makes me think it's the right stuff, but I seem to recall that we had some placeholder SRKW language that you wanted to replace. **So...can you please confirm that the SRKW write-up in the current draft (*Environmental Baseline v3 - srb - nh - noa.doc*) is what YOU sent over for inclusion in the Environmental Baseline section?**

Sorry to cover potentially old territory, but I figure that some cross-checks on version control worthwhile (and helps me to understand where all the parts are).

Thanks,
Barb
