Subject: A version for you in case VPN finks out

Note -- I have started to make edits to the attached doc (also saved on ROCON drive), which is what you sent to Maria with all original track changes showing. To highlight today's later round of edits, I changed my username to:

Username: NMFS_5.29_pm

Initials: NMFSpm

expect to be back at it around 7:30. I think I only have 1-2 hours of tweaks, depending on if I run into issues with the loss tables.

FYI, for your pop context write-up, attached is the worksheet with the loss numbers and pop estimates. I will be adding in (in-line in text) for WR, SR, and steelhead:

- (a) annual combined SWP & CVP loss (see highlighted tables on "Annual" tab), and
- (b) monthly combined SWP & CVP loss (see highlighted tables on "Monthly" tab) -- WR table still to be generated.

I will explain in the SR loss table section how we downscaled the SR data; you should just be clear that you're using the "adjusted" SR data for the pop context numbers.
