Hi all,

HB added the language to the EnvB from fws language.  
Does consistent mean exactly the same? it is probably not that.  
But it is very similar. I can look at the two now.

The management team has been tracking the WOA discussion, but Naseem has been tracking the evolution of the environmental baseline section and incorporating reviewers' comments. Who should put pen to paper (or at least look at the characterization of the WOA scenario in both the current NMFS environmental baseline section and the USFWS', attached) to "ensure" that both sections are consistent?

**Subject:** ROC FWS BiOp Environmental Baseline

The Environmental Baseline section for delta smelt and delta smelt critical habitat is attached. The discussion of the without action scenario is on the first two pages.
