Eric,

I'm still trying to get the data that Reclamation used to develop the graph, but in the mean time, can you determine the relationship between Shasta storage, cold water pool, and temperature compliance point (and in turn, confirm the bins in the graph)?

Handout from Reclamation during the October 27, 2016, Shasta RPA adjustments technical team meeting.

This was a hindcasting of past Shasta storages and relationship to cold water storage (<52 degrees).
