**Attachments:** EOA Storage to Temp Depend Mort correlation model inputs.xlsx

Eric,

Please use 3.5 MAF for End of April in critically dry years. Reclamation agreed to that.

-Garwin-

Hey Eric,

Based on our conservation, attached are a set of model inputs to try and understand how End of April storage correlates to temperature dependent mortality. I based the model inputs off of the last twenty years of historical data with extra weight attributed what we learned the last couple of years. Let me know what you think or if you need anything else. Thanks!

Brycen
