Subject: Re: CWF adaptive management framework

Not exactly sure what Carl means by retroactive but the program is intended to continue the adaptive management from "the current" BiOps AND Cal WaterFix going forward.

From the Framework document:

Together, the Five Agencies commit to ongoing adaptive management under the current Biological Opinions of the combined operations of the Central Valley Project (CVP) and State Water Project (SWP), as well as the effects of future operations under California WaterFix (CWF). This document sets forth the Adaptive Management Program (AMP) to reduce uncertainty and improve the performance of Central Valley Project and State Water Project water operations under the current Biological Opinions and CWF.

Does that help?

Evan,

I'm in a ROC on LTO meeting, and Carl indicated that the CWF adaptive management framework (stand alone document) associated with CWF is retroactive to NMFS' 2009 CVP/SWP operations BiOp. Dave Mooney said that Reclamation doesn't agree with that. Know anything about this?
