Hi Katrina:

Attached are suggested edits and comments for your and the group's consideration.

Most of these are trying to improve clarity and consistency. I apologize if any of them, or comments in the margins, are inconsistent with the discussion at the last meeting (which I'm sorry I missed) or other positions already determined by the group, to whom I defer.

Z

Subject: ROC on LTO MOU for your review by COB 10/6/2017

Hello all -

Thank you for attending the meeting yesterday regarding the Reinitiation of Consultation on the Coordinated Long-term Operation of the CVP and SWP Memorandum of Understanding.

Attached is a revised MOU with edits in track changes. These new edits are marked with my name, and in the comments the commenter is identified. This MOU incorporates the edits we discussed at yesterday's (Monday, 10/2) meeting, as well as subsequent edits received from Glenn Colusa Irrigation District (Thad sent to the group already), Friant Water Authority, and DFW.

Please provide any last edits or concerns with the MOU by the end of the day Friday, 10/6/2017.

Outstanding items are:

- Inclusion of California WaterFix operations in the ROC on LTO
- economic and technological feasibility of RPA
- PWA input on USFWS or NMFS's RPA
- NMFS to check on One BO to the extent feasible

Resolved issues are:

- proposed species
- consensus / FACA language
- Coordination with DFW

Reclamation will work to address any last edits next week, have any last conversations required, and then raise the CWF issue to management in the next few weeks. Please note that Thad has suggested some text that may provide flexibility on the CWF issue and allow us to move forwards with the MOU: "new planned facilities as may be necessary and appropriate". Please let us know if you feel this language is adequate, in which case we will finalize the MOU and start sending it around for signatures after addressing any final edits and the other outstanding items.

Thank you,

Katrina Harrison
