Subject: [1/11/18] Reclamation-NMFS coordination for Shasta RPA Workshop #4

Hi all,

I thought it best to get this out before our "pre-workshop" meeting tomorrow; attached is the most recent version of the Science Work Plan, which will be discussed/presented at Workshop #4. The most substantive change is the inclusion of an approach to prioritize and implement the research necessary to address the Management Questions. This approach is also a means of keeping the Science Plan relevant going forward during the Shasta RPA Amendment process and for the ROC on LTO.

Thanks,

Evan Sawyer
