Hi all –

In December, you received an email from Katrina Harrison, the ROC on LTO project manager at USBR's Bay Delta Office, about scheduling a Delta brainstorming workshop. Based on your Doodle poll responses, **we are confirming that workshop for Friday, January 19.**

As you know, in August 2016, Reclamation, along with DWR as the applicant, reinitiated Section 7 Endangered Species Act consultation on the Coordinated Long-term Operations (LTO) of the Central Valley Project and State Water Project. Since that time, they have been working to set up a framework for the reinitiation of consultation (ROC) on the LTO. The ROC on LTO may include changes to operations, habitat restoration, or infrastructure to assist in meeting the authorized purposes of the CVP and SWP. For more information on the ROC on LTO, see USBR's website: <https://www.usbr.gov/mp/BayDeltaOffice/lto.html>.

USBR is trying to obtain ideas prior to developing alternatives to make sure they have a robust range of actions moving forwards. This technical brainstorming workshop with engineers and fisheries biologists is intended to generate those ideas as they pertain to the Delta.

You know the system best - **how can USBR improve? Please bring your ideas, and be prepared to come up with new ones.**

I am helping Katrina and her team with scheduling and logistics, so please keep your eye out for more information and agendas from me in advance of the workshop.

Thank you,
Terra
